Population Change in Shanghai City

2020-2025(Projection)

Researching Interests: Why Shanghai City

Total Population Count

Q: Dose Shanghai affected by the Covid-19?

Shanghai's birth rate dropped to 4.4 per 1,000 people from 4.7 a year earlier, while its death rate increased to 6.0 per 1,000 people from 5.6 due to a rapidly ageing population...

According to Reuters: Many women in Shanghai were put off having children during a stringent COVID lockdown in April and May last year, which demographers said could have profoundly damaged their desire to have children.

Future Population Growing Trends(til 2035)
